RESOLUTION NO. 10458

WHEREAS, the Commission on Elections (COMELEC) is mandated under Section 29 of Republic Act No. 8436, as amended by Section 24 of Republic Act No. 9369, to conduct random manual audit;

WHEREAS, from the experience of the past three automated elections and taking into consideration recent developments, COMELEC deemed it necessary to update and amend the foregoing resolutions;

NOW THEREFORE, pursuant to the powers vested in it by the Constitution and other existing laws, COMELEC RESOLVED, as it hereby RESOLVES to promulgate the following General Instructions for the conduct of Random Manual Audit relative to the 13 May 2019 Automated National and Local Elections and subsequent elections thereafter:

SECTION 1. - Principles and Objectives of the Random Manual Audit (RMA). As mandated by law, there shall be a manual audit of the precinct vote count results generated by the automated voting and/or counting machine used for the election in one
randomly selected precinct from each of the legislative districts in the country.

The required number of random sampling of precincts to be audited implies that the coverage of the RMA is national. RMA results, whether of national or local positions, are aggregated on a national level. Audit conclusions are therefore made on a national level. Conversely, no audit conclusion can be made in relation to individualized local contests.

Manual audit refers to the visual reading and counting of votes on a paper ballot or its equivalent, without the use of a machine, and a comparison of said results to results generated by the machine count.

In an automated election that employs the Optical Mark Reader (OMR) technology, the official precinct vote count is generated using the OMR Counting Machine prescribed by COMELEC for the election. The standard that should guide the manual or visual interpretation of vote marks or shades on the paper ballot in the course of the audit must therefore be the manner by which the OMR Counting Machine was configured to interpret said vote marks or shades.

The RMA shall be transparent, participative and credible.

SECTION 2. - The RMA Committee (RMAC). There shall be an RMA Committee or RMAC, which shall ensure that the RMA proceeds in an efficient, credible, and transparent manner. The RMAC shall be composed of the representatives of:

a) a Civil Society Organization (CSO) accredited as a citizens’ arm, and/or recognized, by COMELEC;

b) the Philippine Statistics Authority (PSA); and

c) the COMELEC.

The CSO representative shall be the Chairperson of the RMAC.

The COMELEC representative shall be a Senior Director, whose principal function is to manage the logistical and administrative requirements of the RMA to ensure that the objectives are achieved in an orderly, efficient, and secure process. He or she shall ensure that the integrity of the election documents that will be used in the RMA process are preserved.

A Commissioner of COMELEC may be assigned to oversee the preparation and conduct of the RMA.

The RMAC shall issue Instructions in execution of its mandate under this Resolution and such other resolutions which may be promulgated by COMELEC. The RMAC shall decide matters by a majority vote.

SECTION 3. Number Precincts to be Randomly Selected for the RMA. At least one clustered precinct in every legislative district shall be randomly selected for the RMA.

The actual number of precincts to be selected in a legislative district shall be determined by proportional allocation, that is, based on the number of clustered precincts a legislative district has in proportion to that of all the other legislative districts in the country.

The COMELEC, upon the recommendation of the RMAC, shall decide on the
maximum total number of clustered precincts to be selected based on statistical sampling principles and taking into consideration resources available.

For purposes of the 13 May 2019 National and Local Elections, the maximum total number of clustered precincts to be selected shall not be more than seven hundred and fifteen (715).

Once the maximum total number of clustered precincts to be selected is determined, COMELEC shall approve the proportional allocation of the actual number of clustered precincts to be selected in each legislative district based on the recommendation of the PSA. The approval on the proportional allocation shall be made not later than ninety (90) days before the election.

SECTION 4. - The Random Selection of Precincts for the RMA. The random selection of the precincts for the RMA shall be conducted publicly in the following manner:

a) At 12:00 noon on Election Day, the RMAC shall first randomly select the municipality/city from which the clustered precincts are to be selected under paragraph c of this provision.

b) The List of the Specific Municipalities/Cities shall be released to the public at 2:00 p.m. on Election Day.

c) At 9:00 a.m. of the day after the election, the RMAC shall randomly select from the municipalities/cities identified earlier, the specific sample precincts for the RMA.

The source code of the automated random selection program may be reviewed by representatives of Registered Political Parties and Accredited Citizens’ Arm Groups.

Registered Political Parties and Accredited Citizens’ Arm Groups interested in conducting a Source Code Review shall signify their intent in writing, submit the methodologies which they intend to use and the name of their representative who will review the Source Code, on or before the 30th of January of the Election Year for approval of COMELEC.
